FEDERAL

HIGH OVER ALL™

20 GAUGE, 28 GAUGE AND .410

Engineered for the most elite trap, skeet and sporting clays shooters, Federal Premium® High Over All leaves a trail of shattered targets in its wake and more reloads per shell. Its hard, high-antimony lead payload and wad produce the most consistent patterns, while the solid brass head and hull design make reloading easier than ever. It's the ultimate competition load for the world's best shooters.

HEVI-BISMUTH™

9.6 G/CC BISMUTH WITH THE FLITECONTROL FLEX WAD

If you've never experienced the performance of bismuth pellets, you need to. Federal Premium HEVI-Bismuth hits both upland birds and waterfowl with the power of 9.6 g/cc density pellets. Sourced from our partners at HEVI-Shot®, the industry leader in pellet technology, HEVI-Bismuth shot is 22 percent denser than steel, delivering more lethal energy downrange. Launched by the FLITECONTROL FLEX® wad, bismuth pellets pattern consistently, and their metallic properties make them safe in both modern and classic shotguns. Alloyed and cast in the USA.

BLACK CLOUD™

28 GAUGE

More than a decade ago, Black Cloud changed the definition of performance for steel waterfowl loads. That revolution continues today with Black Cloud 28-gauge 3-inch offerings that redefine the capability of sub-gauges. Like all Black Cloud loads, they use the FLITECONTROL FLEX wad to deliver better pattern density and consistency through both ported and standard waterfowl chokes. The high-performance primer and clean-burning, temperature-stable propellant significantly decrease residue in the barrel.

HI-BIRD™

FIBER WAD

Reduce your impact on high-volume shoots. Hi-Bird Fiber Wad's cellulose-based over-powder wad construction helps minimize plastic left in the field with the same great performance as the original. It's perfect for the field or preserve hunting situations. Available in one 12-gauge, 2 3/4-inch, 1 1/4-ounce, No. 5 load; 1,330 FPS.

PREMIUM™ BUCKSHOT

NO. 1 COPPER-PLATED BUCKSHOT

At Federal, we engineer shotshells to provide the same precision performance as all of our other loads, and the new Premium Buckshot 1 buck offering is no exception. Its payload of 16 copper-plated pellets produces tight patterns for more hits and better stopping power on predators, hogs and more.

POWER-SHOK™ BUCKSHOT

NO. 1 BUCKSHOT

Hunters have a great option for hogs, predators and more in our new Power-Shok 1 buck offering. The load provides the patterns and terminal performance needed, thanks to the Triple Plus® wad system, quality lead pellets and granulated plastic buffer that minimizes shot deformation.

GOLD MEDAL® ACTION PISTOL

9MM LUGER AND 40 S&W

Compete at the highest level with loads designed specifically for the action shooting sports. New Gold Medal Action Pistol offers even better accuracy and consistency than original Gold Medal, and it's loaded to power-factor requirements. The fully encapsulated FMJ bullet and Catalyst lead-free primer deliver cleaner shooting.

FEDERAL® PUNCH™

30 SUPER CARRY

Federal engineers designed both Punch ammunition and the new 30 Super Carry cartridge from the ground up for self-defense, and the two have come together in a load that's far easier to shoot effectively. The blending of the two technologies gives shooters an extremely effective option for real-world defense.

FEDERAL® TRAIN + PROTECT™

10MM AUTO

Federal has made it easier than ever to honor your birthright to bear arms with a new Train + Protect load in 10mm Auto. The full-power offering features a VHP™ bullet to deliver both precise, practical performance at the range, and instant, reliable expansion on impact.

PUNCH™ RIMFIRE

22 WMR

There's another effective option in the Punch rimfire lineup. The new 45-grain 22 WMR load's nickel-plated lead-core bullet is propelled at extreme velocities and engineered to hit critical penetration depths through short-barrel handguns. Stringent function testing also ensures the most reliable ignition, cycling and overall performance.

ELD-X®

This match-accurate, hard-hitting hunting bullet stands apart thanks to an extremely high ballistic coefficient and a design that provides effective expansion at a wide range of velocities. It features a unique polymer tip that resists deformation to achieve consistent ballistics and initiate extreme-range expansion, as well as a concentric copper jacket and robust shank. Available in nine centerfire cartridge options from 243 Win. to 300 Win. Magnum.

GOLD MEDAL® CENTERSTRIKE™

Introducing an all-new way to truly go the distance. Gold Medal CenterStrike's proprietary open tip match bullet has a sleek profile and is held to extremely tight specifications for the ultimate long-range accuracy and consistency. Available in 308 Win., 6.5 Creedmoor and 223 Rem.

POWER-SHOK® 360 BUCKHAMMER

The tag-filling efficiency of Federal Power-Shok has made it a legend in hunting camps from the northwoods to the mountains and everywhere in between. Two offerings in the all-new 360 Buckhammer cartridge are adding a new chapter to the line's story. The straight-wall cartridge is specifically designed for lever-actions, legal in more areas, and deadly-accurate past 200 yards. The .358 diameter bullet delivers energy and trajectory similar to 30-30 Win., with softer recoil for better accuracy in the field.

PODIUM® WAD

Podium wads drive peak performance in High Over All competition target loads, and they're now available as a component for reloading. The design's cylinder-shaped compression zone supports the payload and provides unmatched protection from deformation at ignition for the best patterns and fewer flyers. The soft-shooting wad's unique profile allows it to be loaded in all tapered hulls.

HEVI-METAL XTREME 12 AND 20 GAUGE

A layer of HEVI-Shot's original 12 g/cc HEVI-XII tungsten pellets (30 percent) is stacked over steel pellets (70 percent) in this all-new load. The dense tungsten pellets are three shot sizes smaller than the steel pellets to ensure both layers have equal downrange performance. The load features the FLITECONTROL FLEX® wad for consistent long-range patterns and is set to blistering velocities. Available in four 12- and 20-gauge loads.

HEVI-BISMUTH™ WATERFOWL 28-GAUGE NO. 4 AND 6 SHOT LOADS

HEVI-Bismuth is safe for both modern and classic waterfowl shotguns. Its 9.6 g/cc pellets allow shooters to drop a shot size from their go-to steel payload. Now there's a choice for every wingshooter, with offerings from .410 to 10 gauge, including two new 28-gauge loads.

HEVI-XII™ NO. 2, 4 AND 6 12 AND 20 GAUGE

The original 12 density HEVI-Shot, HEVI-XII hits harder from a longer distance. Its pellet material is 53.8 percent denser than steel-doubling the downrange energy. Drop three shot sizes for the same lethality and 28 percent more devastating pellets on target. Available in a full line of loads, including new No. 2, 4 and 6 offerings in 12 and 20 gauge.

HEVI-HAMMER® UPLAND & DOVE NO. 3, 5 AND 7 12 AND 20 GAUGE

Increase your success in the field with tighter patterns, higher speeds and more power. With 15 percent high-density bismuth layered over 85 percent steel pellets, HEVI-Hammer packs nearly 50 percent more power than steel at 40 yards. Both bismuth and steel feature the same shot size for the energy that hits like a hammer. Available in new No. 3, 5 and 7 loads in 12 and 20 gauge.

HEVI-18™ TSS 28 GAUGE AND REDUCED-RECOIL 12 GAUGE

HEVI-18 TSS brings best-in-class performance to the turkey market with 18 g/cc density pellets in No. 7 and 9 shot. The loads provide high pellet counts, long-range lethality and incredibly tight patterns thanks to the friction-free, sealed-in-the-shell spherical buffer. Now available in reduced-recoil 12- and 20-gauge loads, as well as 28 gauge.

HEVI-BISMUTH UPLAND 12, 16, 20 AND 28 GAUGE, AND .410

Hit upland birds harder with the power of 9.6 g/cc HEVI-Bismuth. The loads are safe for classic and modern shotguns and available to in a full line of options, including new offerings in 12, 16, 20 and 28 gauge, and .410.

MAGNUM BLEND® 3-INCH 28 GAUGE

Once for ounce, dollar for dollar, this is the most lethal turkey shell on the market. Like the original HEVI-Shot load, Magnum Blend offers three shot sizes (5, 6 and 7) in a single shell. The 12 g/cc cast tungsten lets you drop one shot size from lead for the same lethality. These heavy loads really pack some punch—437 deadly pellets in a single 12-gauge, 3-inch shell. Now available in 3-inch 28 gauge.

HEVI-HAMMER WATERFOWL 12 GAUGE 3 1/2-INCH LOADS

Meticulously layered non-toxic bismuth (15 percent of the payload) over steel gives you more range with added density, tighter patterns and improved shot strings. Available in a wide selection of 12- and 20-gauge options, including new 3 1/2-inch 12-gauge No. 2, 4 and BB.

Remington®

NEW CARTRIDGE

360 BUCKHAMMER

AVAILABLE IN 180- AND 200- GRAIN CORE-LOKT

Introducing the straight-wall cartridge that flattens them all. A knock-down, drag-out, lever gun leader, 360 Buckhammer delivers flat trajectories and more bone-busting energy and velocity out to 200 yards. Accurate, deadly, and fun to shoot, it's every deer-flattening advantage you need.

PREMIER LONG RANGE

FEATURING SPEER® IMPACT™

The groundbreaking Speer Impact bullet is now available for the first time in loaded ammunition. Tough bonded construction penetrates deep on closer targets, while the patented Slipstream™ tip initiates expansion at velocities 200 fps lower than standard polymer tips. Combined with carefully selected brass, propellants and primers, Premier Long Range is ready to perform at any distance that you are.

GOLDEN SABER BONDED & GOLDEN SABER DEFENSE

10MM AUTO

Joining Big Green's handgun ammunition lineup are three new 10mm Auto offerings: Golden Saber Bonded and two options in Golden Saber Defense, the all-new concealed-carry go-to. All are proudly loaded in America by American workers, and made from Remington's reliable components.

GUN CLUB® CURE

12 GAUGE

The newest addition to Remington's Gun Club product family is destined to help real families nationwide. A portion of the proceeds from the sale of this ammunition benefits children's hospitals and disease research, meaning your day at the trap, skeet or sporting course gives back to those in need. Available in two 12-gauge loads, including a low-recoil version.

ALLOYED &
CAST IN THE
USA

PREMIER® BISMUTH

12, 16, 20, 28 GAUGE AND .410

New Remington Premier Bismuth lets you hit harder and farther. Loaded with deadly HEVI-Bismuth™, the dense blended shot flies farther with more retained energy over steel, giving you greater performance at longer distances. Premier Bismuth is loaded with top-tier Remington components and is just as lethal in the marsh as it is chasing pheasants.

CORE-LOKT® TIPPED

FULL LINEUP OF CARTRIDGES

The deadliest mushroom in the woods is now even deadlier with the introduction of Remington's groundbreaking line of centerfire rifle big game ammunition, Core-Lokt Tipped. It offers the same proven on-game performance as original Core-Lokt with improved accuracy and long-range potential.

SPEER®

GOLD DOT® CARBINE

For the first time ever, defenders can get Gold Dot's legendary accuracy and terminal performance in ammunition built specifically for carbine platforms. Gold Dot Carbine produces ideal velocities through carbine-length barrels and cycles flawlessly. The G2-style, elastomer filled bullet nose is tuned to produce extremely effective penetration and expansion through common barriers. Available in one 135-grain 9mm Luger load.

CCI®

CLEAN-22® HYPER VELOCITY

Now, get all the benefits of Clean-22 technology with the flat trajectories and power of an extreme velocity load. New Clean-22 Hyper Velocity clocks in at 1550 fps, while its exclusive polymer bullet coating reduces fouling, especially in suppressed rimfires.

ALLIANT POWDER®

Technically Superior by Design

RELODER® TS 11

Craft more accurate, consistent varmint and benchrest loads with the new Reloder TS 11 from Alliant Powder®. The propellant's sophisticated TZ® technology manipulates the response of the material and resists the natural tendency to generate more pressure at higher temperatures and less pressure at lower temperatures. As a result, it delivers extremely consistent velocities across the temperature spectrum. Reloder TS 11 contains no dinitrotoluene or phthalate-based deterrents, so it is REACH-compliant. The patented decoppering agent helps keep copper from building up in the bore, so you shoot more and clean less.
