

2016 NEW PRODUCTS

PROPELLANT

Reloder 16

Repeatable long-range accuracy demands propellant that behaves consistently across temperature extremes. New Alliant Powder® Reloder® 16, like Reloder 23 and AR Comp™, accomplishes this world-class stability using TZ® technology. It manipulates the response of the material and resists the natural tendency to generate more pressure at higher temperatures and less pressure at lower temperatures. The Reloder 16 burn rate is slightly faster than that of Reloder 17, well within the 4350 burn speed band. This makes it ideal for traditional hunting cartridges such as 30-06 Spring. and 270 Win., as well as 6.5mm target loads and tactical applications where temperature stability is required.

Features & Benefits

- World-class stability across temperature extremes
- Contains proprietary de-coppering additive
- Excellent lot-to-lot consistency
- Formulation contains no DNT or DBP
- Made in Sweden for Alliant Powder

Part No.

150689

150690

Description

Reloder 16; 1-pound bottle

Reloder 16; 8-pound canister
