## PROPELLANT

---

### Reloder 26

Achieve awesome ballistics with new Reloder® 26 from Alliant Powder®. The propellant's burn speed falls between that of Reloder® 22 and Reloder® 33, and it incorporates EI® technology to produce extremely high velocities in magnum cartridges. Reloder 26 has a high bulk density that allows larger powder charges, and it provides a consistent, controlled response to temperature changes.

### Features & Benefits

- EI technology produces extremely high velocities in magnum cartridges
- Contains proprietary de-coppering additive
- Controlled temperature stability
- Excellent lot-to-lot consistency
- Formulation contains no DNT or DBP
- Made in Switzerland for Alliant Powder
