PROPELLANT

Sport Pistol

Precision and action shooters need consistent, clean-burning propellant that lets them perform to their peak when a competition is on the line. New Alliant Powder® Sport Pistol™ delivers on these demands with extremely reliable cycling, excellent charging and case fill, and ballistics that lend themselves to a range of popular loads. Sport Pistol delivers precise performance with all bullet types, but the low-muzzle-flash formulation was optimized for polymer-coated bullets. Other double base powders can dissolve the polymer coatings at the bullet base, and this exposes the lead to vaporization due to the intense heat during the ballistic cycle. The medium-fast burning Sport Pistol is also very temperature stable, so there is little velocity deviation to worry about at seasonal competitions.

Features & Benefits

- Clean-burning formulation
- Versatile ballistics
- Great temperature stability
- Excellent charging and case fill
- Low muzzle flash
- Optimized for polymer-coated bullets
- Made in the U.S.A.

Part No.	Description	UPC	MSRP
150691	Sport Pistol 1-pound	6-04544-62263-8	\$27.25
150693	Sport Pistol 4-pound	6-04544-62265-2	\$99.70
150692	Sport Pistol 8-pound	6-04544-62264-5	\$184.75
