RIMFIRE RIFLE

Mini-Mag Segmented Hollow Point

Mini-Mag[®] was CCI's first 22 LR offering and it's still one of the most popular, offering unbeatable accuracy, high velocities, flat trajectories and superior reliability. The new Mini-Mag Segmented Hollow Point combines all of what made the original a favorite with a bullet engineered to split into three equal-size parts on impact, creating three distinct wound channels that quickly take down small game and varmints. The ammunition also features CCI's extremely reliable priming and specialized powders for clean, consistent ignition.

Features & Benefits

- Segmented Hollow Point bullet offering
- Bullet design splits into three equal size parts on impact
- Flat shooting and highly accurate to maximize effective range
- Reliable feeding
- Clean-burning powder causes significantly less barrel fouling
- Consistent CCI priming
