PREMIUM RIFLE

224 Valkyrie

Federal Premium has drawn from its 95 years of ammunition manufacturing excellence to develop an all-new cartridge that transforms the MSR 15 platform, unleashes shooters' long-range potential and shatters the boundaries of ballistic performance. The 224 Valkyrie provides extremely flat trajectories and match accuracy beyond 1,300 yards. The cartridge offers significantly less wind drift and drop than other loads in its class, as well as less than half the recoil of cartridges with comparable ballistics. Loaded in an unmatched array of high-performance projectiles, 224 Valkyrie is the new choice for both long-range target shooters and hunters.

Features & Benefits

- All-new cartridge produces the least wind drift and drop in its class
- Supersonic past 1,300 yards (GM224VLK1)
- Significantly less recoil than other cartridges with comparable ballistics
- Loaded in an unmatched range of high-performance bullets
- Better ballistic performance than any other AR-15 cartridge
- Superb accuracy and extreme long-range performance in bolt-action rifles
