

2019 NEW PRODUCTS

CENTERFIRE RIFLE

224 Valkyrie

In 2018, we transformed the MSR 15 platform and broke all boundaries of ballistic performance by introducing the 224 Valkyrie cartridge. Now we're giving hunters and shooters three new loads that stretch the cartridge's capabilities even further: 80.5-grain Gold Medal® Berger® Hybrid, 60-grain Hornady® V-Max® and 78-grain Barnes® Triple-Shock® X. Like all 224 Valkyrie offerings, the new loads provide extremely flat trajectories and match accuracy at extreme range. They offer significantly less wind drift and drop than other loads in their class, as well as less than half the recoil of cartridges with comparable ballistics.

Features & Benefits

- New Berger Hybrid, Hornady V-Max and Barnes TSX bullet offerings
- Least wind drift and drop in the category
- Significantly less recoil than other cartridges with comparable ballistics
- Better ballistic performance than any other MSR 15 cartridge
- Superb accuracy and extreme long-range performance in bolt-action rifles

Part No.	Description	UPC	MSRP
GM224VLKBH2	224 Valkyrie 80.5 grain Gold Medal Berger Hybrid	6-04544-65176-8	\$32.95
