

2016 NEW PRODUCTS

PREMIUM PERSONAL DEFENSE

9mm Luger Micro HST

Subcompact handguns' sleek, lightweight designs make them an ideal choice for concealed carry. To perform to their peak, these firearms need the right ammunition: Federal Premium® Personal Defense® Micro HST®. The line, introduced in 2015 with the 380 Micro HST, provides consistent expansion, optimum penetration and superior terminal performance with bullet weights and propellants optimized for the most efficient cycling and accuracy in subcompact handguns. For 2016, the line has expanded to include a 150-grain 9mm Luger load.

Features & Benefits

- New 9mm Luger load for micro-size concealed carry pistols
- Heavy bullet and lower velocity decreases felt recoil and noise
- Expanded diameter and weight retention produce the desired penetration for personal defense situations, without over-penetrating
- Bullet nose profile, nickel-plated case and Federal primer provide the ultimate in function and reliability in semi-automatic handguns
- Clean-burning, low-flash propellants
