

## 2017 NEW PRODUCTS

### PREMIUM PERSONAL DEFENSE

---

#### 38 Special +P HST Micro

Subcompact handguns' sleek, lightweight designs make them an ideal choice for concealed carry. To perform to their peak, these firearms need the right ammunition: Federal Premium® Personal Defense® HST® Micro. The line provides consistent expansion, optimum penetration and superior terminal performance with bullet weights and propellants optimized for the most efficiency and accuracy in subcompact handguns. For 2017, the line has expanded to include a 130-grain 38 Special +P load with a deeply seated bullet that eliminates excess air space in the case for the most consistent velocities.

#### Features & Benefits

- New 38 Special +P load for micro-size concealed carry revolvers
- Deep bullet seating eliminates inconsistent powder burn rates
- Law enforcement proven HST bullet design
- Expanded diameter and weight retention produce the desired penetration for personal defense situations, without over-penetrating
- Clean-burning, low-flash propellants
