HEAVYWEIGHT TSS

Kill gobblers at longer distances than ever before with HEAVYWEIGHT® TSS. Its payload of No. 7 or 9 HEAVYWEIGHT Tungsten Super Shot provides the highest pellet counts possible—up to double those of lead No. 5 loads of the same weight. The tungsten-alloy material’s 18 gm/cc density is 22 percent higher than standard tungsten and 56 percent more than lead. The result is the most energy and highest velocities at extreme range. Its rear-braking FLITECONTROL FLEX™ wad performs flawlessly through ported and standard turkey chokes for the most consistent, deadly patterns possible.

Features & Benefits

- HEAVYWEIGHT TSS payload with advanced buffering material
- As much as twice the pellet count of lead No. 5 loads of the same weight
- 22 percent denser material than standard tungsten; 56 percent denser than lead
- FLITECONTROL FLEX wad provides extremely tight, consistent patterns through standard and ported turkey chokes*
- Roll crimp and clear card wad keeps buffering material in place
- Full-length wads prevent direct contact of the extra-hard pellets and the bore, protecting the barrel
- 5-count pack
- 12-gauge, 20-gauge and .410 loads available
- A portion of the proceeds are donated to the National Wild Turkey Federation
