FEDERAL RIFLE

Power•Shok Copper

Federal® has expanded its selection of Power-Shok® Copper offerings with a new 120-grain 300 Blackout load. The entire lineup provides the same freezer-filling consistency of original Power-Shok with a non-lead bullet. The accurate, hollow-point copper projectile creates large wound channels, and the Catalyst™ lead-free primer provides the most efficient and reliable ignition possible.

Features & Benefits

- New 120-grain 300 Blackout
- Lead-free copper bullet construction
- Hollow-point design expands consistently
- Accurate, reliable performance
- Large wound channels and efficient energy transfer to the target
- Federal brass
- Catalyst lead-free primer provides the most efficient ignition
