

PRAIRIE STORM BISMUTH BLEND

When you need a non-lead upland option that doesn't sacrifice performance, fill your vest with new Prairie Storm® Bismuth Blend. The loads build off Prairie Storm's proven formula of the FLITECONTROL FLEX® wad and Premium® steel shot, with the added performance boost of HEVI-Bismuth™ pellets alloyed and cast in Sweet Home, Oregon. Making up 30 percent of the payload, the 9.6 g/cc HEVI-Bismuth pellets are nearly as dense as lead, retaining more energy and velocity at longer range.
