PREMIUM HANDGUN HUNTING

Vital-Shok® Trophy Bonded® 10mm Auto

The new Vital-Shok™ Trophy Bonded 10mm Auto is a full-power load that takes complete advantage of the caliber’s true capability. While most 10mm loads are watered down to produce ballistics similar to those of the 40 S&W, this cartridge offers the muscle needed for both big game hunting and personal protection. Its new Trophy Bonded Jacketed Soft Point bullet design makes the load even more effective. Based on the proven Trophy Bonded® Bear Claw® rifle bullet, its heavy jacket features a formed inner profile that preprograms and controls expansion to ensure deep penetration.

Features & Benefits

- Full-power 10mm Auto load provides superior downrange energy
- 1275 fps muzzle velocity
- Trophy Bonded JSP bullet provides consistent expansion and deep penetration
- Nickel-plated case for easy extraction

Part No.	Description	UPC	MSRP
