

HEVI-METAL XTREME

DESCRIPTION

The next evolution in waterfowl hunting is here. HEVI-Metal Xtreme™ uses Pattern Density Technology™ to devote 30 percent of the payload to HEVI-Shot® 12 g/cc tungsten pellets and stack them over steel shot. The dense tungsten pellets are three shot sizes smaller than the steel to ensure both layers have equal downrange performance. The load features the FLITECONTROL FLEX® wad for consistent long-range patterns and is pushed at high velocities.
