## SHOTGUNS

---

### 555 Compact

Stevens has made its 555 over-and-under line even more versatile with the new 555 Compact. The stylish shotgun has a mid-length fore-end and a compact, 13.25-inch length-of-pull, making it perfect for smaller-framed shooters. Like the original 555, it features a light aluminum receiver that's scaled to gauge. A steel insert reinforces the breech, minimizing weight and maximizing strength. The 555 Compact sports a Turkish walnut stock and fore-end, shell extractors, a manual safety, and a single, selective mechanical trigger—all at a superb price. Five interchangeable choke tubes allow the fast-handling gun to meet any shooting need.

#### Features & Benefits

- Mid-length forearm and compact 13.25-inch length of pull
- Lightweight aluminum receiver scaled to gauge
- Single, selective mechanical trigger
- Turkish walnut stock and fore-end
- Chrome-lined barrels
- Tang-mounted safety
