

Bushnell®

AK OPTICS RED DOT & RIFLESCOPE

MARKET RELEASE DATE:

April 1, 2016

The AK-47 is one of history's most resilient rifles, and it's worthy of optics that are every bit as durable. Bushnell offers a pair of sighting solutions to range targets.

The AK Optics Rifle scope highlights your target with an illuminated AK BDC reticle. Eight brightness levels adapt to any setting, any time, anywhere. And its 1-piece aircraft aluminum tube is as rugged and relentless as your AK-47 itself. The AK Optics Red Dot offers a quick-pointing dot with 11 intensity settings. The integral mount works on any Picatinny rail or Weaver-style case, and its far more rugged than its four-ounce weight would suggest.

FEATURES & BENEFITS

- » Illuminated AK BDC reticle on rifle scope
- » Eight brightness settings on rifle scope
- » Battery, plus spare, included with rifle scope
- » Red Dot Sight features 3 MOA red dot
- » Red Dot Sight is waterproof/fogproof/shockproof
