

Bushnell®

LRHS (LONG RANGE HUNTING SCOPE)

MARKET RELEASE DATE:

June 1, 2016

The LRHS (Long Range Hunting Scope) is based on proven designs developed in our acclaimed Elite® Tactical scope line. However, the LRHS is not just a tactical or target scope dressed up for the field. It is a purpose-built optic specially designed with input from the experts to meet the needs of hunters who require optimum performance at extreme ranges.

New for 2016, hunters can now realize the advantages of an illuminated reticle in those final moments of legal shooting light.

The LRHS features Bushnell's exclusive G2H and G2M reticles. These milliradian and MOA-based first focal plane reticles are specifically designed to allow hunters to range targets, and then holdover and counter the effects of wind at any magnification setting. The scope has a low profile, tactical-style elevation turret.

Step up to the Bushnell LRHS and extend your maximum effective range as a shooter and hunter.

FEATURES & BENEFITS

- » G2H, G2H-I and G2M reticles allow ranging at any magnification
- » 30mm tube for increased adjustment travel
- » RainGuard HD Lens coating
- » Fully multi-coated optics
- » 95% light transmission
- » Side parallax adjustment
