Pole Cat Steady Rest

Using the Pole Cat is like shooting from a bench in the field. The Primos® Pole Cat steady rest is an ultra-light shooting tripod that provides two points of support for your rifle. Quick adjustment levers allow users to adjust two legs simultaneously or micro-adjust elevation with front leg when in shooting position. The Pole Cat steady rest adjusts from sitting to standing positions and is excellent for making long range shots.

Features & Benefits

- Unique, ultra-light shooting tripod that supports the front and rear of the rifle
- Rear support extends all the way to the ground to remove gun movement
- Excellent for long range shots in the field or at the range
- Quick adjustment levers allows users to adjust two legs simultaneously
- Ability to micro-adjust elevation with front leg while in shooting position
- Can be used as a tripod or bipod
- Adjusts from sitting to standing positions
