RIFLESCOPES

Predator/Varmint 1-6x 24mm Riflescope

The new 1-6x 24mm Predator/Varmint scope from Simmons® is engineered for maximum versatility on modern sporting rifles and is packed with a host of varmint-dropping features. Multi-coated lenses offer extremely bright, high-contrast images. Fingertip-adjustable turrets allow fast, pinpoint-precise adjustments. Plus, an all-new illuminated, Strike Zone 223 ballistic reticle is calibrated for common .223/5.56 loads for precise shot placement on the smaller vital areas of coyotes and varmints. With its fully waterproof and fog proof design, the Predator/Varmint scope is the perfect tool for turning the hunters into the hunted.

Features & Benefits

- Strike Zone 223 Reticle is calibrated for common .223/5.56 hunting loads
- 11 illumination settings for low-light predator hunting
- Fully multi-coated optics provide bright, high-contrast images
- SureGrip rubber on all adjustments surfaces
- Rugged 30mm tube
