

BALLISTIC APP

Ballistic is the definitive ballistics trajectory calculator for iOS devices, intended for serious shooters who want a seriously accurate application. Ballistic calculates trajectory, windage, velocity, energy, lead, and bullet flight time for any valid range. Ballistic can compensate for atmospheric conditions such as temperature, barometric pressure, humidity, and altitude.

With a vast library of over 5,000 projectiles and factory loads, and advanced features like Mil-Dot and MOA rangefinder, GPS and atmosphere awareness, full size charts, reloading companion, precision target log, and option HUD for mounted firing.

Now includes load data for Remington factory ammo and projectiles such as Core-Lokt Tipped, Premier Long Range, and Core-Lokt Copper.

FEATURES

- Complete precision marksman tool for hunting or the range
- Calculates your ballistics chart, wind drift, and trajectory for your load
- 5,000+ library of projectiles and loads
- Mil-Dot + MOA rangefinder & GPS + atmospheric awareness
- New Remington, Federal Premium, and Speer Ammunition load data available
- Free to download
