

HYPERSONIC STEEL

It's a simple fact. Most ducks are missed from behind. The good news? The unprecedented velocity of Remington Hypersonic Steel® compensates by getting your shot on target faster – reducing the lead on flying fowl by a full body length at 40 yards. The result: more pellets on game for quicker kills, fewer misses, and a full bag limit – all without changing the way you shoot. Hypersonic Steel takes waterfowl lethality to deadly new heights.

FEATURES

- The world's fastest, hardest-hitting steel
- 1,700 FPS gives you an 8" lead advantage or 11% shorter lead at 40 yards
- Patented Xcelerator™ wad technology – Delivers record velocity while holding patterns downrange
- Featuring Premier-quality components, including zinc-plated steel shot, Remington high-tensile hulls and carefully chosen propellant/primer combinations for optimal velocity and performance
- Fully compatible with ported and wad-stripping chokes
