

### Premier TSS

Send more Toms to the ground with Premier TSS turkey loads. Remington's deadliest turkey shell to-date, ultra-dense Tungsten Super Shot payloads deliver increased lethal range, denser patterns and more knockdown power. TSS density makes a smaller shot size viable over what you'd choose in lead shot, with increased pellet counts, energy and velocity increases and better patterns than lead to boot. Gobbler hunters should look for an expanding line of TSS options from Remington starting with 12GA, 20GA and .410 bore.

### FEATURES

- 12GA, 20GA, .410 Bore available
- 18g/cc TSS blend is 22% denser than standard tungsten and over 55% denser than lead
- Higher energy and denser patterns than lead
- Exclusive new Remington R top-wad secures shot and buffering for consistent patterns
- Carefully selected propellants and primers for optimal velocity
- 5-count boxes

ORDER #	DESCRIPTION	UPC	MSRP
28043	12 Gauge 3" 7 Shot	047700 53040 6	\$68.99
