

## 2020 NEW PRODUCTS

### Target & Plinking

### Clean-22 Suppressor

Now silence isn't just golden—it's clean. New CCI® Clean-22™ Suppressor 22 LR uses an advanced polymer bullet coating to reduce lead fouling inside a suppressor up to 60 percent. The exclusive feature allows much easier suppressor cleaning and maintenance, as well as excellent accuracy. With dependable CCI priming and consistent propellant, the loads cycle reliably through any suppressed firearm.

### Features & Benefits

- Polymer bullet coating reduces lead fouling in suppressors up to 60 percent
- Ballistically optimized 45-grain lead round nose bullet
- Reliable function in semi-automatic firearms
- Extremely reliable CCI priming
