TRAINING SHOTSHELL

BallistiClean Frangible Slug & Buckshot

Train hard without making hard sacrifices. BallistiClean® frangible slug and buckshot loads provide uncompromising reliability and performance with Catalyst™, the only 100 percent lead-free primer design proven as reliable as conventional lead styphnate primers. Combined with BallistiClean's non-lead projectiles, which break up on impact with hard targets, these slug and buckshot loads result in the safest shooting and most realistic, effective training.

Features & Benefits

- 100 percent lead-free Catalyst primer
- Primer compound is non-hygroscopic, has no shelf life and easily ignites a large variety of shotshell powders
- Lead-free frangible slugs and buckshot reduce the amount of splash-back on steel targets
- Clean and consistent
- Provides ballistic performance and feel almost identical to duty loads
- 25-count box

Part No.	Description	UPC	MSRP
