Personal Defense Handgun

HST

We've made the HST® bullet design even more versatile and effective with three power-packed new loads in 9mm Luger +P, 357 Sig and 45 Auto +P. All provide large, consistent expansion, optimum penetration and superior terminal performance. The specially designed hollow point won't plug while passing through a variety of barriers, and the bullet jacket and core hold together to provide nearly 100 percent weight retention through even the toughest materials.

Features & Benefits

- New 124-grain 9mm Luger +P, 125-grain 357 Sig and 230-grain 45 Auto +P loads
- Specially designed hollow point expands reliably through a variety of barriers
- Expanded diameter and weight retention produce the desired penetration for self-defense situations without over penetrating
- Superior performance in FBI test protocol used by law enforcement officials to assess and select duty ammunition
- Bullet nose profile, nickel-plated case and Federal's unique primer provide the ultimate in function and reliability in semi-automatic handguns
