

## HI-BIRD FIBER WAD BISMUTH

Introducing a more effective way to minimize your footprint without giving up performance. New Hi-Bird® Fiber Wad Bismuth features the same cellulose over-powder wad technology as original Hi-Bird Fiber Wad, but with a payload of 9.6 g/cc bismuth to meet non-toxic requirements. The pellets are 22 percent denser than steel, delivering more energy downrange, and the cellulose over-powder wad minimizes plastic left in the field.
