Personal Defense Handgun

Hydra-Shok Deep 380 Auto

The bullet design that redefined performance for one of the most trusted self-defense loads has now brought the 380 Auto cartridge to all-new heights. Powered by the Hydra-Shok Deep® bullet, this offering is the first expanding 380 Auto load to consistently penetrate beyond the FBI-recommended 12-inch minimum. Like all Hydra-Shok Deep loads, its bullet's more robust center post and core design ensure it penetrates to critical depths through common self-defense barriers, without over-penetrating.

Features & Benefits

- First expanding 380 Auto to consistently penetrate beyond FBI-recommended 12-inch minimum in bare gel and through heavy clothing
- Improved penetration through common barriers
- Iconic center post design has been improved for better, more consistent expansion through standard barriers
- Consistent, specially formulated propellant
- Extremely reliable Federal® primer with sealant
