Personal Defense Handgun

Hydra-Shok Deep 38 Special +P & 380 Auto

Shooters shouldn't have to settle for substandard protection from any platform. Hydra-Shok Deep® has unlocked the full defensive potential of smaller cartridges with loads in 380 Auto and 38 Special +P. Both utilize Hydra-Shok Deep's robust center post and compact core design to consistently penetrate beyond the FBI-recommended 12-inch minimum through bare gel and heavy clothing—without over-penetrating. The bullets expand aggressively, pushed at ideal velocities by high-quality primers and consistent propellant.

Features & Benefits

- New 380 Auto and 38 Special +P loads
- Consistent penetration beyond FBI-recommended 12-inch minimum in bare gel and through heavy clothing
- Performs reliably through any barrel length
- Iconic center post design has been improved for better, more dependable expansion through standard barriers
- Specially formulated propellant
- Extremely reliable primer with sealant
