

ULTRA STEEL

Waterfowlers live for those moments when the birds do it right. And in those moments, they want a shell that does the rest. New Federal Premium® Ultra™ Steel blends the rear-opening FLITECONTROL FLEX® wad with a payload of our best zinc-plated steel, producing extremely tight patterns for even deadlier performance. Available in a variety of standard payloads, as well as loads that feature two sizes of shot: smaller pellets that create full patterns and larger ones that deliver better lethality.
