Upland

Upland Steel With Paper Wad

Put more birds on the ground—and less plastic. Federal® Upland Steel uses the new Paper Wad, cellulose-based filler and a paper gas-sealing over-powder wad to produce effective patterns while significantly reducing the amount of plastic left in the field. Its high velocity makes the most of the 1-ounce steel payload.

Features & Benefits

- Exclusive Paper Wad
- High-quality steel payloads
- Paper gas-sealing over-powder wad
- Cellulose-based filler material
- Consistent, reliable Federal primers
- Select, clean-burning propellant
- High velocity
