

## HYPERSONIC BONDED

It's fair to say that HyperSonic Bonded is the most lethal big-game ammunition ever engineered. With hyper-charged velocities up to 200 fps faster than standard loads, it delivers laser-flat trajectories and higher downrange energies. Simply put, it plows through hide, meat, and bone like a hot knife through butter. By pairing the most advanced bonded bullet design of Core-Lokt® Ultra Bonded with a proprietary blend of propellants, HyperSonic Bonded is a high velocity load that's second to none.

## FEATURES

- Carries boosted velocities and energies through heavy bone with absolute lethal command
- Delivers velocities up to 200 fps faster than standard loads
- First-quality brass for consistent feeding and extraction
