3x Comp**STRIKE** Scope

Weaver's new 3x Comp**STRIKE** scope features a compact internal prism design for a package that is perfect for a variety of firearms—including hunting, modular, competition and tactical models. The 3x magnification and illuminated center dot reticle are an optimized blend for precision shots at intermediate ranges and lightning-fast target acquisition. The etched-glass reticle features eight illumination levels and is still visible with illumination turned off. A 30mm objective lens provides a wide field of view and bright image. Integral mounts make installation quick and easy on most firearms, including modern sporting rifles.

Features & Benefits

- 3x magnification for intermediate-range shooting
- Illuminated center dot reticle for fast target acquisition
- Compact design for tactical, competition and hunting needs
- Integral mounts for easy installation
- Fast focus diopter adjustment
