

Designed for field or range with industry-leading finishes.

BN1036G

NEW FOR 2018

NITRO™ BINOCULARS

Experienced hunters and shooters know the value of spotting the target before taking aim. Bushnell® Nitro™ binoculars are built to deliver, starting with ED Prime Glass lenses that deliver true-to-life color. Bushnell's exclusive EXO™ Barrier lens coating and rubber armor housing protect the binoculars from weather, dust, debris and wear and tear.

INDUSTRY LEADING FEATURES:

EXO BARRIER - Protective coating bonds to exterior lenses, repelling water, oil, dust and debris for clear viewing in even the worst weather.

ED PRIME GLASS - Delivers best-in-class color, even in low-light situations.

PC-3® PHASE COATING - Applied to the prisms, it enhances resolution and contrast for brightest possible images.
