Bino Harness

Butler Creek Featherlight Binocular Case

Based off our successful bino harness, the new Butler Creek Bino Case allows quick one-handed access to your optics. Using strong magnets, the front lid folds down securely out of the way with another magnet allowing optics to be supported in the open reinforced pouch. Your binoculars stay safe and secure with our quick disconnect, removable safety straps. Fully secure your binoculars by simply pulling up the front lid until the magnets engage. With a mesh interior zippered pocket an elastic interior side pouch with cleaning cloth, and a rear zippered pocket, there is ample storage for your hunting license, maps or anything else you wish to carry. Attach your Rangefinder pouch to the side d-loops or front and side MOLLE webbing to have all your optics readily accessible.
