

D.O.E. VEST (DISPLAY)

PRODUCT #: PC-DOE-COLOR

NEW!

The D.O.E. vest Body Armor Carrier is constructed of 500D cordura brand fabrics, yielding a lightweight, durable material. The D.O.E. vest system consists of a Front body that has a top load armor plate pocket sized to fit a ESAPI cut plate generously for easy insertion/removal. On the front of the carrier is an admin pocket, ID window and flashlight pocket. On the sides of the admin pocket are vertical slots for coms mic. Across the front of the vest there are 4 M4 mag hardside pouches with bungee retention on the top. In front of the M4 pouches there is a single 9mm magazine pouch with bungee retention on that as well. Located on either side of the vest are pouches created for a radio, in front of the radio pockets are cuff pouches. The inside of the vest is mesh for breathability and comfort.

The D.O.E. vest features large adjustable padded shoulder straps. The back of the vest is made from mesh for light weight and breathability in the absence of a rear plate. The rear of the vest features MOLLE attachment as well as a tubular webbing drag strap. Elastic waist bands are provided in two sizes for a more custom fit.
