

KINETIC PIERCE PLATINUM AND KINETIC PIERCE

The surgically accurate .166 Kinetic Pierce is the wind-defying choice for bowhunters that live for long-range shooting and ultimate penetration. Hard hitting micro-diameter, coupled with Gold Tip's patent pending Ballistic Collar help drive it home on the biggest of game.

- Kinetic Pierce Platinum- .0025 straightness and weight sorted to + / - .5 grains. Includes GTO nocks and collars for back-end durability.
- Kinetic Pierce- .006 straightness and weight of + / - 2 grains. GTO nocks only.
- Ballistic Collars increase penetration, front-end durability and FOC balance. 8/32 broadhead and field point compatible.
- 100% Carbon Construction offer unmatched durability and straightness retention
- New Fusion X 2.1" shield cut vane. The optimal size and profile for broadhead and field tip accuracy.
- Glue in Accu-Points and pin nock/bushings available for professional or competitive use.
- FACT weight system compatible
