200122

Water can cause havoc with most optics, but it won't phase Tasco® Off Shore binoculars. Water and fog can't penetrate them – rubber o-rings seal nitrogen-purged tubes, keeping the binoculars free from moisture. The multi-coated optics offer premium light transmission for low light situations while eliminating the glare that is often prevalent in marine environments.

- » Multi-coated lenses
- » Rugged, weather-resistant housing
- » Powerful, affordable optics in a wide variety of sizes and configurations
